It already is apparent that the extraordinary unsettling of party lines in congress is destined to exert a profound influence upon the political history of the next two years. Among the effects foreseen are the making and breaking of numerous presidential booms in both parties, and among the possibilities is the return of the Democratic to complete power in the presidential and congressional election of 1924.

"In spite of this showing, which past experience proves should be conclusive, we are confronted wherever we turn with cumulative evidence that leaders of the city hall outfit are publicly proclaiming that the final canvass will prove that Righeimer, not Jarecki, is elected. The same veiled threats also apply to other successful candidates.

"And, as if to give verisimilitude to the undercurrent of accusation of con-templated fraud, the county judge him-self unexpectedly departs from Chi-cago while preparations for the official canvass are under way; and his board of election commissioners, when they met today to begin the canvass, adopt-ed a motion to postpone such canvass

In the election postmertem discussions interest was aroused by the discovery that the total vote was not so

Now there's an Instant Quaker Outs—the quickest-cooking can in the world. It cooks in 3 to 5 minutes, and cooks to perfection. Your grocer has both Instant and regular. So you can, if you wish, have the oat dish ready before the eggs or coffee.

Quickness, plus super-flavor

Quaker Oats won their world-wide fame through flavor. They dominate all the earth over, because people love that flavor. They are flaked from queen grains only—just the rich, plump, flavory oats. We get but ten pounds of these luscious flakes from a bushel of choice oats.

Instant Quaker is flaked from the same queen grains. But the oats are cut before flaking. They are rolled very thin and partly cooked. So the flakes are smaller and thinner—that is all. And those small, thin flakes cook quickly.

Now, if you want that exquisite flavor, you must get Quaker Oats. If you want five-minute cooking you must get Quaker Oats. Get either style you like best. But, for one or both of those reasons, get Quaker. You want the utmost in this food of foods—the greatest food that grows.

This might have occurred through perverseness of American papers in quoting krone as Jugo-Slav currency.

Jugo-Slavis is a creation of the former Serbia and Montenegro and the Jugo-Slav provinces of the former Austria-Hungary. After the union was effected the Berbian dinar was adopted as the monetary unit for the new state. Throughout the liberated provinces the Austrian krone was exchanged at the rate of four for one dinar. Krone therefore, does not exist in Jugo Slavia. It is only as imaginary currency representing

in value one fourth of the existing legal unit, the dinar.

Thus when you quoted on your financial page of the same date: Jugo-Slavia 30.43, that in resilty meant: 100 Jugo-Slav units [dinars] 51.72.

How this unit compares [today and a year age] with the units of those countries having the same-par value [19.3 cents] and which your chart classes as "almost worthless" let this little table has witness.

A new shaving era

We've processed a barber's edge - the keenest cutting edge known-on a safety razor blade! That's the story in few words.

Now we offer you the world's fastest shave—a velvet shave in 78 seconds from lather to towel. We talk in terms of time, because the only way to get a quick shave is with a super-keen blade. Old-time ways won't do it. Put your watch before

you and prove it to yourself. Once over the face-that's all

With this new edge, you run over your face one time—only. A second is not needed. And that's where you cut shaving time one-half. And spare your face, for dull-edged blades injure the skin.

Three men in four, past 35, skin specialists tell us,

Where the

look ten years older than they are because o improper methods of shaving. No scraping. No after-shave smart. No shaving lotions needed, this new way.

Sharpens itself

We recommend your using our famous strop for the same reason a barber strops his razor. It keeps up the keenness. It works as a part of each razor-there if you care to use it, or, if you choose, you can just insert new blades as you feel the need. Self-stropping is a patented Valet AutoStrop feature. It helps to give you the world's fastest shave every day.

Prove it - by the clock

Pick up a Valet AutoStrop Razor at your dealer's. Then give it a whirl tomorrow. Shave with your watch before you.

Note the time-78 seconds for a velvet shave! That's our proposition.

To you, it will prove a revelation.

T IS natural that the millers of Pillsbury's Best Flour should also make a better pancake flour. The test shown above will convince you that Pillsbury's Pancake Flour is better. And the tender, delicious, golden-brown pancakes which Pillsbury's makes will give you the final proof.

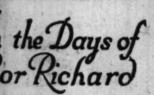

Food experts know that there is no substitute for high-grade, fine-textured wheat flour if you wish to make perfect pancakes. Coarser flours, including harsh, gritty corn meal, are cheaper; but they do not give the lightness, flavor and digestibility so much to be desired.

Pillsbury's Pancake Flour contains only the best quality ingredients, including the same creamywhite wheat flour you yourself use in baking bread or cake. That is why Pillsbury's pancakes are so fluffy and delicious - so easy to digest and so nourishing. Give your family this treat tomorrow morning. They, and you too, will always want Pillsbury's pancakes once you try them. Ask your grocer today for Pillsbury's Pancake Flour.

Decide to Push Campaign with All Vigor.

Attorney Robert Holt, veteran of many legal skirmishes with followers of Wilbur Glenn Voliva, overseer of Zion, was selected yesterday as chief counsel for the commission of Methodist ministers and laymen appointed at the last Rock River conference to wage an offensive in the federal courts against enforcement of "freak" ordinances in Zion City.

Attorney Holt was absent from the city yesterday and the commission was compelled to postpone its plan of maphowever, and those who attended the meeting decided to push the campaisp with all speed possible. Attorney R. Clarence Brown was appointed secretary of the commission and Dr. E. S. Tittle of Evanston was named as chairman of the finance committee. Dr. John Thompson of Oak Park was selected to head the publicity committee.

George W. Dixon of the Arthur Dix-on Transfer company headed the com-mittee which selected Attorney Holt as counsel. Besides the Rev. Dr. A. F. Clark, chairman of the commission, clark, chairman of the commission, others who attended the meeting were the Rev. Drs. W. R. Wedderspoon, H. V. Holt, L. F. W. Lesemann, and J. H. Odgers; Henry S. Capital Character and Credit

—are the three recognized dimensions of business.

The fourth is Tradition. Any business which has endured for 86 years has given proof of its service to the public.

The Public Ledger was the *first* Philadelphia newspaper to install a Hoe Rotary Press; to use telegraphic service; to construct a building devoted exclusively to publication purposes.

It was the *first* to inaugurate a special Cable Service, spending at present more than \$20,000 a month for cable news alone. Through its leased wire and cable service, it distributes daily the news of the world to more than 300 newspapers in the United States and Canada.

The Public Ledger is the only Philadelphia newspaper to maintain an exclusive World News Service. Its Far East news is the best in the world. Eminent journalists represent it in foreign lands. Its Washington correspondents and local writers are all stars.

The result is a superior newspaper with a superior circulation.

The Public Ledger in nine years has increased the daily circulation of its editions from 45,000 to more than 260,000 and its Sunday circulation is more than 220,000.

Each year an increasing number of merchants and manufacturers who seek the patronage of Philadelphians and Pennsylvanians are capitalizing on the confidence and good will which the Public Ledger has established in the minds of its 260,000 readers.

Three students who appeared as witnesses yesterday told of the powers Moore has claimed for himself and the promises of "health, wealth, friends, poise, power, and recognition" for those who follow his teachings. The three, Mrs. Shirley P. Talcott, Miss Marie Stewart, and Harold J. Stot, were called by the court instead of by the state at the request of Assistant State's Attorney William F. McLaughlis.

"Greater than Christ."

Mrs. Cartwright's contention that Moore had claimed to be able to raise the dead and heal incurable diseases was upheld by Miss Stewart and Stot. They admitted he had claimed to be greater than Christ.

Mrs. Cartwright told of two "cures" which Moore had effected. One, she said, was a case of cancer, another that of a deaf man. The woman with cancer is now dead, another witness said, and the deaf man, Mrs. Cartwright testified, became more deaf than ever. Mrs. Cartwright said she gave Moore more than \$1,000. Mrs. Talcott testified her donations had totaled \$7,000. The others contributed similar amounts.

Meeting Harry King, 1301 North Wells street, Martin went on to 609 North Wells street, where the Phillips girl was waiting for them with Mrs. Silvia Conie, 22 years old, who formerly worked with the runaway at a Peorla store. The girl came to Chicago with Mrs. Conie, she said, and while looking for employment Monday met Martin.

THE polls closed at 4 o'clock. Tribune presses started roaring at 9 o'clock. By breakfast time two hundred tons of newsprint had been converted into 606,419 Tribunes and distributed not only throughout Chicago but in thousands of other cities and towns. Tens of thousands more could have been sold had we been able to print them.

How does The Tribune achieve this stupendous task? How does it gather so swiftly this multitude of facts and statistics, check them, edit

them, set them in type, print them and distribute them? The story is told in a book recently published entitled "The W G N." In 304 pages with more than one hundred illustrations this book graphically depicts every process, reportorial, editorial, mechanical, in the production of The Chicago Tribune. It is on sale at the following loop book stores: A. C. McClurg; Carson, Pirie, Scott & Co.; A. Kroch; Chandler; Fanny Butcher; Covici-McGee. It will be mailed post paid on receipt of \$2.00 by the Business Survey, 1711 Tribune Building.

HAVRE EARS ITCH FOR STORY FROM BISHOP'S WIDOW with Chi

BY EDWARD DOHERTY.

Havre, Mont., Nov. S.—[Special.]—

Mrs. Leonard J. Christler, widow of the rector of St. Marks, is expected to return to Havre this week. She has been east burying her husband, the Rev.

Mr. Christler, known as "the Bishop of All Outdoors," who was shot and killed a week ago Thursday night by his light of love, Mrs. Margaret Carleton. Mrs. Carleton then shot and killed herself.

The news sent a thrill through this drab little town. It was even more exciting than the election. Maybe Mrs. Christler would talk when she got home. Maybe she would tell what transpired in her home the night of the shooting. Not the shooting fiself. Havre is satisfied it was murder and suicide, but just before the shoeting.

Must have It shooting? Havre is a moral town, a godly town, a dry, respectable, orderly town—but it loves its drama blood raw. Chief of Police Moran questioned Mrs. Christler but little.

"I was there, just after the shooting, when she called Bishop Fabet," he said. "Her voice was calm, but there was something in it that cut me to the heart.

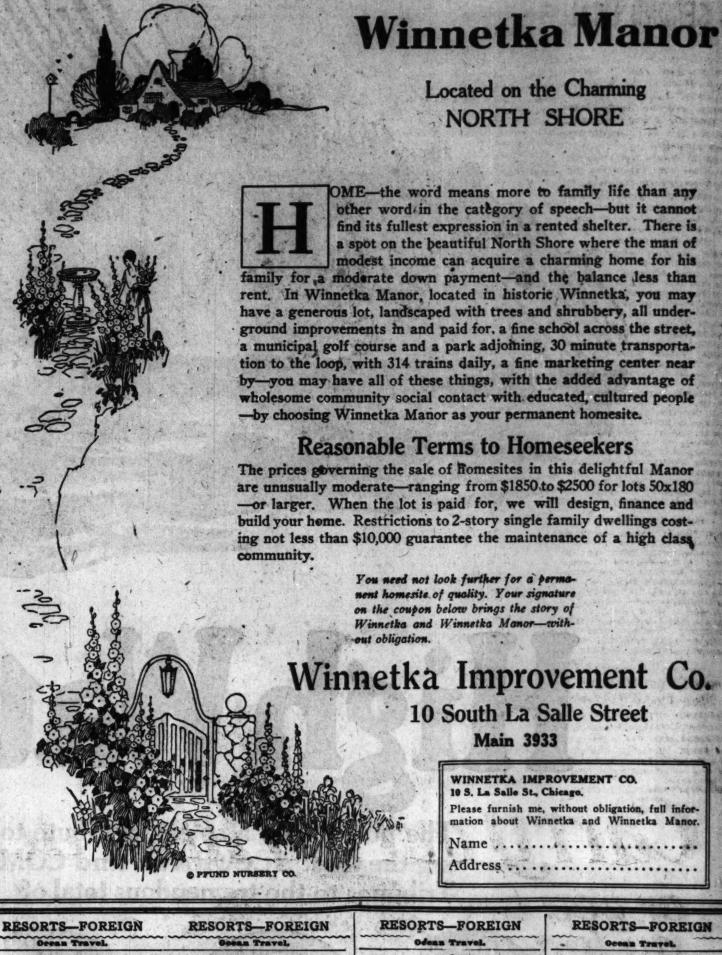

"Calm, not hysterical for a moment of the shooting. Not the shooting fiself. Havre is satisfied it was murder and suicide, but just before the shooting.

"However, when she returns I shall certainly ask her a lot of questions about what went on just before the inghooting, and I am certain she will

TOU have not carried out my instructions," the dentist said, with a note of impatience

"Six months ago, when you were in my office, I ordered you to use Kolynos Dental Cream. Now your mouth shows YOU HAVE NOT BEEN CARRYING OUT MY INSTRUCTIONS, but have been using something GRITTY.

"Your teeth, being soft, are beginning to show scratches. I have done the BEST I CAN to preserve the artistic lines and beauty of your mouth. You certainly cannot mean that YOU REFUSE to aid me!"

This is not a fanciful incident. The statement was made, as quoted, by an Eastern dentist who stands high in his profession.

Keep Your Teeth Lustrous

Do you realize HOW VITAL it is to the HEALTH and DURABILITY of your teeth, no less than TO THEIR BEAUTY, that you keep them lustrous WITH-OUT THE USE OF GRIT?

Do you realize that the health, beauty and durability of your teeth ALSO DEPEND upon your keeping the MOUTH MEMBRANES in a purified, hygienic con-

The teeth cannot be kept healthful-OR EVEN REPT AT ALL—unless the gums and tooth sockets are

sound. These cannot be kept sound unless the mouth IS REGULARLY CLEANSED AND PURIFIED.

We have on file in our New Haven laboratories personal applications from over 47,000 American Dentists and 74,000 American Physicians for Kolynos Dental Cream, to distribute among their patients.

Kolynos Dental Cream not only CLEANSES and PURIFIES the mouth, but also keeps the teeth polished to their PEARLY NATURAL LUSTRE, without the use of a TRACE OF GRIT.

Beauty and Health

But an EVEN GREATER VALUE OF KOLY-NOS, in the judgment of dentists and physicians, is that it DISSOLVES THE TOOTH FILM and eliminates HUNDREDS OF MILLIONS OF THE GERMS which produce the tooth-destroying acids. It goes directly to the CAUSE of tooth decay and REMOVES it.

Then your teeth REMAIN BEAUTIFUL and RE-MAIN IN YOUR HEAD.

Test it-try a few days of mouth happiness!

Yellow

Has no closed doors

Dignity may be a good thing on the bench, in a church or even in a bank, but amongst thousands of industrious, earnest men working for a common end, it is more or less of an obstacle. It often shuts off progressive ideas.

The executives and employees of Yellow Cab are fellow-stockholders and friends. No imaginary lines of caste separate them. What interests one, interests the other. The organization is wholly a democratic one.

The men are encouraged to bring their personal woes to the office and discuss them with the executives - their friends—who are able to—and will take a practical interest in them. There are no closed doors. No officer is so big that the men can't reach him at will.

The close personal feeling thus established is beneficial to the organization-- and to the whole city. Employees are responsible for many of the good ideas that have helped to make this the greatest cab service in the whole world. Had they been held at arm's length, the ideas would have died at their birth.

If an employee has a grievance, he can take it to the President if he wants to. If he has personal troubles, the President will help him more than any outsider would or could. It is a mighty close, happy family. There is no other community just like it in this country.

And all this has a tremendous bearing on the kind of cab service the Yellow Cab renders to you.

Another angle of the case will be considered today. Government counsel have before the court a motion that the controversy be referred to a special master in chancery, to whom evidence intended to support the conspiracy charge upon which the restraining rder was granted would be submitted

In support of his motion to dissolve the injunction Mr. Richberg reasserted the injunction Mr. Richberg reasserted his contention that there is no need for it, since, he argued, the strike has ended. And, as on Monday, when the hearing started, he maintained the government had no legal right to make the order effective throughout the country. This, the defense urged, was encroaching upon the province of district country.

encroaching upon the province of district courts.

Jacob M. Dickinson, special assistant attorney general, and Blackburn Esterline, assistant solicitor general, presented the government's case. Referring to the charge that Attorney General Harry M. Daugherty erred in resorting to drastic injunction, Mr. Dickinson said: "We have reached a point where it becomes a public necessity to know what the law is," adding that "If the law be not declared, and, in its light, a peaceable and just solution provided by congress, the nation is headed for an Iliad of woes."

Mr. Dickinson, who was secretary of war under the Roosevelt administration, said the railway shopmen's strike had aroused "an outraged people."

The real Vermont maple flavor is there

MAYFLOWER Syrup is made in the heart of Vermont.

The fullest flavored maple is gathered for it from sugar camps right nearby, and the men who blend it are Vermonters. Their lives have been spent in getting the utmost in flavor out of maple sap.
They would not be satisfied to produce a syrup that
had other than a wealth of maple flavor.

Only enough refined granulated sugar is added to the maple for Mayflower Syrup to make it richer-looking than it would be without it.

Mayflower Syrup is sold in both cans and bottles in pint and quart sizes-larger quantities only in cans. Perhaps you are not aware that you get more in a pint of syrup than you would in a pound. A pint is one-eighth of a gallon,

while a pound is only one-eleventh. To be sure of getting full measure, buy Mayflower.

The Vermont maple flavor of Mayflower Syrup will give you a real treat. Buy a can today and start this minute looking forward to a pancake feast tomorrow morning. Your grocer has it, or can get it for you.

Borsec Abernethey, a missely musician, willed his musical library unreservedly to Saxe Temple, a young musician and the son of the woman he had loved in his youth, and left in three hundred thousand dollars in gold, contingent on Saxe's finding, within a month property, including his house in Maine and the grounds surrounding it, he had jeft to fayoung cousin, Margaret West. If Saxe failed to locate the gold within a specified time it was to the divided by his lawyer, half to go to Margaret West and the other Half to be used as a foundation for a home for disabled musicians.

it was to be divided by his lawyer, half to go to Margaret West and the other Half to be sare is determined to find the money in order, that he may devote all his time to the composition of operas, so he enlists the aid of his three indomitable friends, Billy Walker, Boy Morton, and David Thwing, who styre to accompany him to the old miner's home in Margaret Morton, and David Thwing, who styre to accompany him to the old miner's home in Margaret Morton, and here conduct a systematic earch for the treasure.

May Thurston, the pretty young secretary of Abernether, had been asked by the lawyer to remain in the house after the musician's death. She is engaged to Hartley Masters, an engineer employed in the neighborhood. He is an unscrupulous fellow, and when May tells him of the strange will he makes up his mind to beat the rightful heir to the treasure if he can. May tries unavailingly to get him to give up the search.

When the four men arrive at the old man's home Margaret West and her mother are already established there. The two women receive the gold hunters graciously.

Sare and his friends, with Margaret West and May Thurston helping whenever and how the same and his friends, with Margaret West and May Thurston helping whenever and how the house and grounds for traces of the gold or clews leading to its intensified by his pleasure in Margaret's winning smile and her gennine sympathy in his search for the fortune, while Roy Morton finds an ever increasing pleasure in the companionship of May Thurston.

Masters transfers his attentions to Margaret West, and when she repulses him, in a passion of greed and jealousy he makes an unsuccessful attempt to kill Saxe Temple. May Thurston finds evidence which convinces her of his guilt, but almost immediately afterwards she learns he is no longer in the neighborhood.

Billy Walker hits upon a clew to the missing money in a sheet of music manuscript but the old musician.

INSTALLMENT XXVIII. THE HOLD.

"Well, then," Saxe continued with animation, "you must bear in mind the fact that those two peaks are the highest on the whole extent of the western shore of the lake. It is, I imagine, very likely that any one in search for a striking object in the landscape would select them at the outset as guides on account of their conspicuousness. It's my belief, after looking pretty closely, that Mount Tabor is shown by the two G's above the staff in the beginning of the gold song. Try it running north from Mount Tabor and compare it with the chart and see if you don't find it brings you all right to the second high mountain, which is marked by the two G's of the second half of the music. And then keep on until you come to the mountain top, much lower but also hogbacked, which seems to me to be indicated by the final C's of the core."

score."

Billy needed no urging. Before his friend had ceased speaking he had brought his whole mind to bear in considering the similarities to which Saxe called his attention. For five minutes he examined first the undulant horizon line and then the chart, which he held outspread before him. He and Saxe were in the stern seats, while Roy and David had places forward, discussing the shore line and giving no heed to what was going on behind them. Suddenly the voice of Billy Walker boomed forth in its fullness:

"By Crossus, Saxe, you've got it! You've pinned the map to the mountains! Bravo, my son!"

At the outburst Roy and David faced about, startled. They saw the unwieldly bulk of Billy swaying with the motion he had imparted to the launch by leaping to his feet. He was a figure of joy, with his little eyes glowing, his hare head a tangle of wind-tossed hair, his harsh features softened by radiance.

"Praise be!" Billy ejaculated, as he waved the chart high in a gesture of triumph. "One of you at last has come to my help. Saxe has run the chart to earth—literally."

The villagers were extremely impressed by the bride, the men awk.

triumph. "One of you at last has come to my help. Saxe has run the chart to earth—literally."

At that there was a lively display of interest. Jake stopped the engine and left the launch to drift laxily while he joined the others for a study of the map in connection with the horizon line discovered by Saxe. Roy and David were inclined to be somewhat skeptical at the outset, but they were presently convinced as they perceived the exactness of the correspondence between mountains and chart. There was jubilation on the part of all.

Jake introduced a topic that was lying in the mind of each:

"But I don't understand yet jest where'bouts that thar money of Mr. Abernethey's might be," he remarked. "What about it?"

"Our esteemed friend has touched on the very cruz of the matter," Billy declared with a noisy sigh. "We have now attained to all the knowledge that we require for our purposes—with a single small exception: We don't know where the gold is. Nevertheless, the chart will tell us. It's there—somewhere. Saxe has done nobly in coming to my assistance. It seems to me that now it's the turn of either Roy or Dave." Billy laughed and then assumed an expression of elephantine demureness. "Roy is something of an expert in occult things," he suggested with his eyes twinkling. "It might be a good idea for him to try his powers on this. The divining rod, in the hands of the gifted, will locate precious metals as well as water, under the surface of the earth. Doubtless it will do as much for gold under water. It is probable that Jake can inform us as to where witch hazel is to be found in the woods. With a twig of that forawand—I believe it is the accepted wood—let Roy go wasdering over the lake in the launch; let him hold the divining rod in his hand until it shall dip toward the water. Let a bucy be floated there to mark the spot, and there we'll dredge, and there will we bring up the old man's treasure."

Roy sniffed, while Saxe and David smiled over Billy's bombast. But Jake and there we will dredge, and there will we bring up the old man's treasure."

Roy sniffed, while Saxe and David smiled over Billy's bombast. But Jake took the suggestion seriously and nodded his approval.

"Allus hearn it would find gold and silver," he said, "but I hain't never

"Allus hearn it would find gold and silver," he said, "but I hain't never seen it done. It's fine for water, though, and that I know, havin' seen it work many a time. It bent, and they dug and the water come, and that's all they was to it."

Two hours after he had retired that night Billy Walker was rudely awakened out of a sound sleep. In a dream, which had been of a curious but a swakened out of a sound sleep. In a dream, which had been of a curious but he flowed and billowed was in the flowed and billowed was in the soldiers get.

Her hair to a vile groggery on the water front in a seaport town, where a horde of rapscallions pounced on him with intent to shanghal. He awoke to behold in the moonlight Saxe, who sat on the edge of the bed, joliting him violently to and fro. When his brain was sufficiently clear, he demanded the meaning of this outrage. The first words from his friend were consolation enough:

"Billy, I've found the place!"

"Quick! Tell met Howd you him it: where is it!
Saxe laughed happily.
"I must give you one final lesson in music to enable you to understand, so simple! I can't guess why I didn't get it in a second."
"The most obvious thing is often the most obscure," came the oracular

"Well?" There was excitement in the harsh whisper.

"Wait until I've lighted the lamp," Saxe said. In a moment it was done. "Now, take another glance at the gold song itself—not the chart." He pulled the sheet from a pocket of the dressing gown that he wore over his pajarmas, and held it up before Billy's face for inspection.

"That shaded half circle," Saxe went on, "with a period in the concavity, over the second measure of the second half of the gold song, is a hold. A hold—a hold, Billy! Don't you understand? Isn't it plain? That marks the spot where the gold is—I know it does. That's the place where we pause, where we hang on!"

"Of course!" Billy Walker's voice had a tone of complete satisfaction. "Tou've done splendidly, Saxe. With much training, I believe I might be able to make something out of your intellect. The chart will show just what part of the shore is indicated by this hold. The gold will be at that point—probably, close to the bank, but certainly under the water, for the first lesson read, 'The Bed of the Lake.' We shall find it without Roy's siving rod, after all."

In the hour preceding dawn Roy gave over his fight against an unaccus-

vining rod, after all."

In the hour preceding dawn Roy gave over his fight against an unaccussined nervousness that had kept him awake, rose, took a sponge bath, aved, and dressed himself for the day. He stele from the room and lietily let himself out of the house, in confident expectation that the outgors charm of dawn would soothe the unrest of his spirit. A slight noise rested his attention as he went toward the north end of the cottage. He is wearing tennis shoes, of which the rubber soles made no sound on a ground, and he went forward with caution, his curiosity aroused, for he is certain that he caught a sibilant whisper. Already there was a rosy typess stealing on the air, so that he could see, though dimly. As he must be the corner of the house he halted and peered covertly forward. He wild distinguish a shadow that moved a little. As his eyes grew accusted to the twilight, he made out there were two forms there, one much larger. Again his ears detected a faint whispering, too indistinct to understood. Then one softly spoken phrase came clearly:

"Come away—they'll hear us." It was the voice of the engineer.

GUB BALL PARK TO BE ALTERED AND ENLARGED

BY IRVING VAUGHAN. Bill Killefer's Cubs won't know the

BILL VEECE Nouncement made yesterday by Pres SMALLEY AGAIN HEADS drawn by Zachary Taylor Davis, designer of Comiskey park and the present cub field, call for an expenditure of approximately \$300,000. The pproximately \$300,000. The presen stand will be cut into three parts, two of which will be moved and the bleach steel structures in right and left field

When the stand is cut the right and left field wings will be separated from the part which circles behind the home the part which circles behind the home plate. The circular piece will be moved about sixty feet toward the intersection of Clark and Addison streets. The right field wing will remain in the same spot, while the left field wing will be rolled back and out so that the farther and touches Waveland avenue. Then the two gaps will be built in.

To give a greater sweep to the stand the playing field will be lowered three feet. This will permit the construction of several rows of boxes in front of the present ones and when completed the structure will measure 165 feet from the front to the last row of seats. There will be no upper tier, but despite this, the stand will have accommodations for \$2.000. The two new bleech. tions for 27,000. The two new bleachers will care for 2,500 each.

According to the figures the playing field will be enlarged considerably despite the erection of bleachers in right and left. From home plate to the front of the open faced seats in right field the distance will be \$56 feet. Left field will measure about the same.

When the Cubs start alterations they will be the fourth big league club engaged in such work.

FARM AND

GARDEN BY FRANK

REVIVING AN OLD STANDBY
CROP ONCE DISCARDED.

A FEW truck gardeners and general farmers were brave enough to attempt the growing of Irish potatoes in their gardens around Chicago last summer a fifer striking this tuber crop from their list several years ago. By using Bordeaux mixture to keep off the leaf hopper, the pest that has been causing so much systericous trouble for many years in this section. Dozens of truckers demonstrated that potatoes can be grown in the Chicago gardening area.

Successful attempts at growing this crop will no doubt have much to dowlith increasing the acreage next year. It has been so long since the average gardener has tried potato growing they have almost forgotten where to begin This is the time of year to start plans for next year's crop.

Fall plowing is one of the most important steps in growing potatoes. Or der the ground and seed the whole patch down with try, and later cover the surface with a good top dressing of stable manura. Potatoes needs a rich self; no matter how rich the rye crop and manure will be needed. Potatoes penetrate the soil to a good depth and for that reason the plowing must be deep. In breaking the soil this fall and next spring.

Next spring, when the rye is about ten or twive inches high, turn it under and then keep the soil with a layer of dust much on the plow and go at least ten inches deep in breaking the soil this fall and next spring.

Lay a HAIR on a piece of paper, and draw the DULLEST razor across it. You will CUT the hair easily. You doubt this—but try it—you'll see! The paper holds the hair firm for the blade's edge. That's why the raser cuts the hair easily.

But the stubble of beard on your face is not a solid surface of hairs. There are thousands of empty spaces between the hairs. The razor jumps across these empty spaces. The zigzag, staggering, jolting, jumping of the razor blade across the empty spaces and through the hairs is what causes the

A Great Discovery that ends all shaving troubles

The soft, firm substance of Barbasol falls the spaces between the hairs, holding them up against the edge of the blade. Barbasol offers the same gentle resistance to the razor as the softened hairs. The razor cuts straight across the base of the hairs close to the skin. You get a smooth, close shave without "pull" with few razor strokes.

Barbasol fills the empty spaces and holds the softened hair up like this-

Diagram of a Barbasol shave-magnified many thousand times

The trouble with lather is that it is light and porous. It lets the weight of the razor turn the hairs down against the face. The blade cuns through the length of the hair, causing the "pull" so many men suffer from in shaving. To get a close shave, with lather, therefore, is difficult. You must go over the face several times, which increases the irritation.

Shave With Barbasol No Soap! No Brush! No Rub-In!

You put Barbasol on your face with the tips of your fingers—gently spreading a soothing, cooling film of Barbasol over the beard stubbles. Then shave. Barbasol requires no rubbing-in.

After shaving, do not use any soap to wash off the Barbasol. Just whe your face with a damp towel, then with a dry towel. For Barbasol itself is the most soothing of face emollients. Barbasol and your razor are all the shaving kit you'll need.

Don't wait another day for your first Barbasol shave. Shave the Barbasol way tonight or tomorrow morning. It will be the best shave you've ever had—a cool, clean, comforting shave without razor "pull" and smarting skin. At most druggiets, 35c and 65c. If yours cannot supply you, send 10c in coin or stamps for one week's trial tube.

Most business problems are sales problems

Production presents real problems from time to time. But a vast majority of business problems today are sales problems.

Invention, standardization, power development, machinery, have made most production problems matters of routine solution.

No matter what kind of business you are in, your biggest problem is the sale of your wares.

Good printing will help you sell your goods. You may doubt that fact, you may ignore it, but unless you are going to use the printing press to help your sales, you might as well drop out now.

The printing press produces selling impulses at the lowest price at which selling impulses can be produced.

You need these selling impulses. Don't try to do without them.

HEN you buy a Miller First Mort-gage Bond, you have the satisof the property securing it is determined by the appraisal of outside, independent real estate dealers, Chambers of Com-merce, public officials and other experts, thoroughly familiar with conditions in their community. This system establishes, at a stroke, the trustworthiness of the valuation figures.

Circulars describing Miller Bond issues reproduce in detail statements given by such appraisers. To the investor, such a system means assurance that his bonds are protected by actual property values, to the amount stated in the offering circular.

In this way investors can safely take advantage of the liberal interest rates offered by Miller Bonds—rates which are based on the legal and prevailing interest in various sections of the country where buildings are financed by us and Miller Bonds are created. The complete system of safeguards surrounding these bonds is described in our booklet, "Creating Good Investments," a copy of which will be sent, postpaid, on receipt of the coupon below.

Coupon bonds in denominations of \$1,000, \$500 and \$100 registerable as to principal only.

Attention is called to the following summary of a letter from Mr. J. B. Deutsch, President:

BUSINESS Lake Independence Lumber Company is the successor to a company of the same name, formerly a subsidiary of The Brunswick-Balke-Collender Company. In addition to the manufacture of lumber the Company continues to produce over three-fourths of the bowling or ten pins used in this country under a guaranteed profit contract with The Brunswick-Balke-Collender Company. The minimum profit on this contract is estimated at \$100,000 annually. The Company is a complete lender company as a complete lender company and acquired the same and a supposed acquired the same acquired the same and a supposed acquired the same plete lumbering operation, having its own railroad, equip-ment and manufacturing plants, backed by a supply of high grade raw material strategically located. It has a distinct advantage over competing hardwood operations in that a considerable portion of its output is manufactured into a finished product at a guaranteed profit.

SECURITY These bonds are to be secured, in opinion of counsel, by a direct, closed first mort-gage on lands, standing timber, plant and equipment in Marquette County, Michigan, having a value as appraised by James D. Lacey & Co. of over \$3,000,000, or more than three times the amount of the entire issue. The balance sheet, as prepared by Messrs. Price, Waterhouse & Co., as of September 30, 1922, and after giving effect to the present financing, discloses net tangible assets after deducting all liabilities except these bonds of \$3,504,-366.45, or over \$3,500 for each \$1,000 bond. EARNINGS Price, Waterhouse & Co. report that for the 5½ years ending June 30, 1922, net earnings available for depreciation, bond principal, interest and Federal taxes, after giving effect to revision in the sale price of bowling pins to accord with the terms of the above mentioned contract, averaged over \$385,000 per

MUNICIPAL BONDS

as a factor in America's Progress

MERICAN communities are more pleasant and healthful A places in which to live than ever before. Improved sanitation, pure water, good schools, smooth, hard roads, in-spiring public buildings have made them so.

These improvements, in turn, have been made possible largely through the issuance of municipal bonds, payable at a future date, thus spreading the burden of payment over a period of years, and permitting the community to have the use of the improvement while tax funds steadily accumulate to meet principal and interest when due.

Just as American communities have progressed through the sale of their bonds, so, too, a host of investors have registered real progress through their payrebase. Municipal bonds as a second in accurity only to government here do

purchase. Municipal bonds are second in security only to government bonds; their income is exempt from Federal Income Taxes; and their yield, while lower than that of some securities, may really exceed the latter when their tax-exemption and safety are considered.

During an extended experience, Halsey, Stuart & Co. has contributed to the progress of hundreds of American municipalities and thousands of ors through outright purchase of entire issues of municipal bonds, and redistribution among investors. Your inquiry will bring further details regarding whichever feature of this two-fold service interests you.

MIAMI BEACH, an all-year-round ocean resort, is located on a beautiful peninsula between the Atlantic Ocean and Biscayne Bay, and just two and one-half miles directly east of Miami, in Dade County, in southeastern Florida. It is connected with the mother city of Miami by a 100 foot wide causeway, three miles long, a notable engineering enterprise, and by Collins bridge and a ferry. The Miami Beach Electric Company operates a trolley line from Miami Beach to Miami on a regular schedule, a loop connecting all parts of Miami Beach with the main line crossing the causeway. Interurban bus lines operate on a regular schedule between Miami Beach and Miami.

MIAMI BEACH, incorporated as a city in 1915, has been one of the fastest growing cities in Florida. Great developments in dredging and filling, partly completed, will double the assessed area of the city. In 1917 the assessed valuation of Miami Beach was \$647,500. In 1922 it is \$6,235,539. This increase in valuation in six years has been accomplished in the pioneer years of the city.

JPPLYING varied needs in almost every household, serving over sixty different industries and manufacturing about two thousand items, The Standard Textile Products Company is the largest producer in the world of light-weight oilcloth and kindred products.

The company manufactures such nationally advertised products as Sanitas wall covering and Meritas, the imitation leather used so widely for automobile tops and upholstery, trunk and suitcase coverings and similar

In addition to doing the larger part of the domestic business in its line, the company's export business in light-weight oilcloths is in normal times over 95% of the total American exports of these products.

The Standard Textile Products Company has recently issued \$6,000,000 First Mortgage 61/2% Twenty-Year Bonds. The dominant position occupied by the company, its large assets and its proven ability over a period of years to meet promptly all obligations make these bonds, in our opinion, a most desirable investment.

Making a Market

Perhaps few people outside of the bond business realize that generally, inherent soundness alone is not sufficient to create and maintain a good market for a bond.

A sinking fund may help a great deal toward that end. The size of the issue is a factor. But finally, the sponsorship. of the underwriting bankers is an all important element.

Broad distribution at the time of the original offering is the initial aid to marketability. Subsequently, the ability and willingness of the investment house to deal in its bonds cannot be over-valued.

Making a market is not necessarily a matter of profit. But a bond house has a primary interest in seeing that its bonds are properly placed. If it has good distributing power, it can and usually does maintain a good market for its issues.

Buy your bonds from a dealer who has this primary interest in issues he sells. It means satisfaction, security and freedom from care.

IN THE COMMON PRINCE TO THE COMMON P

IN 1837 the entire debt of the United States was paid and an embarrassment of money was piling up in the Treasury. Congress decided to distribute over \$28,000,000.00 to the twenty-in individual states.

These states proved little different from the individuals composine them, and the funds were for the most part, quickly dissipated. Illinois spent her share of nearly \$500,000 in extravagant and unsue cessful internal improvements.

Massachusetts deposited her money with her towns. Maine made a per-capita distribution so that even each boy or girl of the state was entitled to \$2.02.

Few of the States had the wisdom and foresight to invest these funds in securities of permanent value to their citizens.

When Does Your Lease Expire?

IF your lease is expiring between now and May first, or if you require more space, the obtaining of suitable office and commercial loft space demands your immediate attention. There is a limited amount of good space to be had at this time that can be leased for immediate or later possession.

WAGES, material, coal, taxes and everything pertaining to office and loft building operation have never been as excessive as now. All observations point to no decrease in operating costs, therefore there will be no lower rent levels.

RENTALS of Chicago's business properties are lower than in any other large community. Rentals of Chicago's business properties are cheaper than any other commodity.

BUSINESS generally is improving. Soon, due to business demands, there will be no desirable space obtainable. I have some excellent office and loft space now available for immediate or later possession. If you are interested I would be pleased to have you call on me in person or by phone.

People versed in American politics had given occasional warning of what the ruling party had to expect in an election following the hard times, the low price of grain, the tariff bill, the "soldiers' bonus" episode and the administration blunders in the strike. Wall street itself predicted reduced congressional pluralities, but could not believe in a reckoning so severe as actually to reverse the huge majorities of 1920, in congress and in half a dozen doubtful states.

Stocks Quickly Turn Upward.

Wall street started business today a little dazed; yet the stock market, after brief hesitation resumed last week's upward movement. Before the closing, which was not far from the day's best prices, net advances of 1 to 3 points were numerous and the whole market at a higher level.

It need not be inferred that his action meant rejoicing by the financial community at the sweeping political overturn. Study of the election results convinced most experienced financial observers rather quickly that this abundantly foreshadowed political reversal was by no means a victory of radical extremists, but a change of party domination, as a rule with continued personnel of reasonable conservatism.

Confusion is Exchange.

Confusion is Exchange.

Confusion is convicted in London while Wall street was keeping holiday, rose 1% continued the fallan lira moved up sharply; this while German marks broke to 1½ one hundredths of a cent and francs fell violently, to a rate nearly % cent below that of a week ago. These movements of today can only be described as incoherent.

Bonds displayed a sagging tendency in today's trading. This condition prevalled in government issues, foreign bonds and rails. Liberty loans lost from 2 to 20 cents and the new treasury 4%s went down, too. The statement from the turn of the year is reassuring in view of the unsettlement in the money market which usually attends large government security offerings.
